COMPREHENSIVE
DENTISTRY FOR
THE ENTIRE FAMILY

STEPHEN D. GLASS, DDS, FAGD

CHRISTOPHER S. ANTON, DDS

THOMAS C. MILLER, DDS, FAGD

Patients of Advanced Dentistry of Spring have a lot to smile about, and when you become a patient, you will too! From second-to-none service to the warm, friendly office atmosphere where you are treated just like family, you will smile because you have found something rare—a dentist you love going to! Best of all? Your smile will be as beautiful, bright, and healthy as ever, thanks to the state-of-the-art dentistry provided by Dr. Stephen Glass, Dr. Thomas Miller, Dr. Chris Anton, and the team at Advanced Dentistry of Spring.

ADVANCED DENTISTRY OF SPRING

By Anna Charles • Photography by Tara Flannery

Patients of all ages love Advanced Dentistry of Spring! Along with an exceptional level of personalized care, the high quality dentistry provided reflects the training, skill and experience, as well as the dedication to excellence shared by the entire team at Advanced Dentistry of Spring. You will also appreciate the convenience of a complete range of services “under one roof” that includes everything from routine cleanings to dental implants, cosmetic and reconstructive dentistry, orthodontics, periodontal treatment, and more. This means you won’t have to hassle with the inconvenience and extra time it can take to be referred elsewhere for specialized services.

Patient comfort and education are also a priority. Even anxious new patients are put at ease, and it’s good to know that nitrous oxide and sedation dentistry (oral and IV) are available as appropriate. Time is spent with each patient explaining treatment recommendations in understandable terms. Dr. Glass explained, “We don’t just provide information and hope for the best, we sit down and talk with our patients, and help them understand their condition and treatment options. You don’t have to be a dentist to understand us. This helps develop a truly collaborative partnership with each patient. Not only are our patients well-informed, they become an active part of the decision-making process about their oral health.”

HIGH TECH DENTISTRY WITH FRIENDLY, PERSONALIZED ATTENTION

Don’t let the relaxed, welcoming office atmosphere fool you. The all-digital, high-tech office boasts the latest equipment including laser systems used for diagnosis and treatment, digital imaging, and much more. “We don’t use advanced technology just for marketing purposes or merely for the sake of technology itself. We carefully evaluate new equipment and systems on a regular basis and select only proven technologies that will enable us to provide superior services to our patients,” Dr. Glass commented.

SMILE, PLEASE! ORTHODONTICS FOR KIDS, TEENS & ADULTS

Everyone deserves a straight, beautiful smile. Luckily, today’s braces are more comfortable, less noticeable, and can work quickly, compared to braces of the past. Advanced Dentistry of Spring’s patients reap the benefits of being treated by an experienced general dentist with extensive continuing education and experience in both cosmetic and restorative treatments as well as orthodontics.

- 6 Month Braces™ by Dr. Glass - an exciting new alternative to aggressive veneer techniques. The result? Beautiful, straight teeth in only a few months.
- Invisalign® - Get the straight smile you’ve always wanted without looking like you’re wearing braces. Invisalign works through a series of clear (invisible), removable, comfortable aligners. Dr. Glass has been using Invisalign to treat patients for years. At each appointment, patient monitors enable you to see exactly what Dr. Glass uses to provide your treatment, and visualize your treatment progression that includes Invisalign treatment animations.
- Braces for kids – With proper timing, more extensive orthodontic treatment may be prevented. As in all orthodontic cases, children will be evaluated and if required, treated for tooth decay prior to orthodontic treatment. Since routine dental hygiene is especially important during orthodontic treatment, hygiene visits can be conveniently coordinated along with normal orthodontic visits.

GOING THE EXTRA SMILE

SINGLE-VISIT CROWNS—BECAUSE YOUR TIME IS IMPORTANT

Say goodbye to the hassle and inconvenience of “old school” crowns that can take up to two visits and the use of a temporary to fully restore your tooth. Dr. Glass and his team use breakthrough technology which enables them to complete beautiful, customized crowns that fit your teeth perfectly in just a single office visit while you are in the chair.

A WISE CHOICE FOR WISDOM TOOTH REMOVAL

With the goal of providing a complete array of services “under one roof,” Advanced Dentistry of Spring (ADS) offers oral surgery and procedures like dental implant placement and wisdom tooth removal performed onsite by a board-certified oral surgeon.

Why should wisdom teeth be removed? Dr. Glass explains that wisdom teeth present problems when they are misaligned. Poor alignment can crowd or damage adjacent teeth, the jawbone, or nerves. “Impacted” wisdom teeth that remain partially or completely entrapped within the soft tissue and/or the jawbone can also present problems. Partial eruption allows an opening for bacteria to enter around the tooth and cause an infection, and they are prone to tooth decay and gum disease because their hard-to-reach location and awkward positioning makes brushing and flossing difficult.

A CUT ABOVE TRADITIONAL GUM SURGERY

Periodontal treatment and gum surgery is easier than you think at Advanced Dentistry of Spring. Using the FDA-cleared PerioLase™ technology, they offer minimally invasive laser gum surgery that is faster and more comfortable than traditional gum surgery. The laser light gently removes harmful bacteria and diseased tissue from the gum pocket.

BENEFITS OF LASER VS. TRADITIONAL GUM SURGERY

- Shortens treatment times from months to weeks
- Fewer dental visits to complete treatment
- No cutting, no stitching
- Less patient discomfort during & after the procedure
- Faster recovery time, usually within a few hours you can be back at work and on your normal routine

Discover the difference exceptional dentistry and patient-centered care can make. Call Advanced Dentistry of Spring at 281-376-0229 and schedule an appointment. Most dental insurance plans are accepted. The helpful staff will be happy to answer insurance questions and file claims.

ADVANCED DENTISTRY OF SPRING—GOING THE EXTRA SMILE

Serving the Spring area since 1976, Advanced Dentistry of Spring was founded by Thomas C. Miller, DDS, FAGD. In 1999, Stephen Glass, DDS, FAGD, joined the practice and had visions of expanding services to provide more comprehensive treatment options to their patients. Dr. Christopher Anton joined the practice in 2009, and together the three offer the ultimate in state-of-the-art services available today.

Advanced Dentistry of Spring's mission is to deliver outstanding dentistry using advanced technology and materials, and an exceptional dental experience for each patient based on their "6 C's" philosophy of care.

Cost – We provide reasonable treatment options realizing that everyone's time and money situation is different.

Convenience – We work to fit your schedule.

Control – We put you in control of the treatment at the pace you want to proceed.

Comfort – We focus on providing you with soft-touch dentistry.

Compassion – We care about your well-being and also understand that you may have had past experiences elsewhere that were not positive. We hope to change that!

Competence – We work every day to improve the quality and expertise of our care for long-lasting dentistry that fits your needs.
